These fruit liqueurs are produced from our cultivation in Franklin, Quebec.

The liqueurs are made by using a combination of fermentation and maceration. No water or additives are added during production, the liquid is purely from the fruit and alcohol. The fruit is delicately pressed in order to exude a maximum of desirable aromas. Our fruit liqueurs have a relatively low sugar content, and their alcohol level is 23% alc./vol.

Our liqueur's aroma, taste and color are purely derived from the fruit, a simplicity and purity like no other.

Sivo fruit liqueurs are perfect as digestifs. It is equally an essential ingredient in numerous cocktails.
